

**AS/NZS 3760:2010**  
Incorporating Amendments No. 1 and No. 2

Joint Australian New Zealand Standard

# **In-service safety inspection and testing of electrical equipment**

Superseding AS/NZS 3760:2003

AS/NZS 3760:2010

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-036 – In-service testing of electrical equipment. It was approved on behalf of the Council of Standards Australia on 2 September 2010 and by the Council of Standards New Zealand on 24 September 2010. It was published on 30 September 2010.

Amendment No. 1, a correction amendment, was approved for publication in Australia by the Standards Council of Australia on 13 April 2011, and for publication in New Zealand by the Acting Minister of Energy and Resources on 15 April 2011, and on behalf of the Standards Council of New Zealand on 19 April 2011.

Amendment No. 2, a correction amendment, was approved for publication in Australia by the Standards Council of Australia on 4 December 2012, and for publication in New Zealand by the Minister of Energy and Resources on 29 November 2012, and on behalf of the Standards Council of New Zealand on 30 November 2012. It was published on 21 December 2012.

The following interests are represented on Committee EL-036:

Australian Chamber of Commerce and Industry	Hire Industry Association of New Zealand
Australian Industry Group (AIG)	Housing Industry Association Australia
Australasian Lighting Industry Association	Institute of Electrical Inspectors Australia
Building Service Contractors of New Zealand (Inc.)	Joint Accreditation System of Australia and New Zealand (JAS-ANZ)
Consulting Interests Australia	Ministry of Economic Development New Zealand
Consulting Interests New Zealand	National Electrical and Communications Association Australia
Consumer Electronic Suppliers Association	New Zealand Electric Fence Energizers Manufacturers Standards Working Group
Department of Labour New Zealand	New Zealand Council of Elders
Department Fair Trading, New South Wales Consumer Protection Agency	Safety Institute of Australia
ElectroTechnical Association Inc.	Schneider Electric Limited New Zealand
Energy Safe Victoria	WorkCover New South Wales
Hire and Rental Association Australian	

### **KEEPING STANDARDS UP TO DATE**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards webshop at [www.standards.com.au](http://www.standards.com.au) or Standards New Zealand's website at [www.standards.co.nz](http://www.standards.co.nz).

Alternatively, Standards Australia publishes an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organisation.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the title page.

# **In-service safety inspection and testing of electrical equipment**

Edition 1 AS 3760:1990  
Edition 2 AS/NZS 3760:1996  
Edition 3 AS/NZS 3760:2000  
Edition 4 AS/NZS 3760:2001  
Edition 5 AS/NZS 3760:2003  
Edition 6 AS/NZS 3760:2010  
Reissued incorporating Amendment No. 1 (April 2011)  
Reissued incorporating Amendment No. 2 (December 2012)

**CONTENTS**

	Referenced documents .....	3
Amd 2 Dec '12	Foreword .....	4
	Outcome statement .....	4
<b>SECTION 1 – SCOPE AND GENERAL</b>		
	1.1 Scope .....	5
	1.2 General .....	6
	1.3 Interpretation .....	8
	1.4 Definitions .....	8
<b>SECTION 2 – INSPECTION AND TESTS</b>		
	2 General .....	13
	2.1 Frequency of inspection and tests .....	13
	2.2 Personnel .....	14
Amd 2 Dec '12	2.3 Inspection and testing .....	14
	2.4 Action resulting from inspection and testing .....	18
	2.5 Documentation .....	19
<b>APPENDICES</b>		
	A Background (Informative) .....	22
	B Guidelines on the electrical knowledge of a competent person (Informative) .....	24
	C Polarity for cord sets and cord extension sets (Normative) .....	25
	D Test of earthing continuity (Normative) .....	28
Amd 2 Dec '12	E Insulation testing (Normative) .....	30
	F Insulation resistance testing of portable isolating transformers (Normative) .....	35
	G Insulation resistance testing of a power supply (Normative) .....	38
	H Test for the operating time of residual current devices (RCDs) (Normative) .....	40
	J Arc welders (Informative) .....	42
Amd 1 Apr '11	K Regulatory application of this Standard (Informative) .....	43
<b>TABLES</b>		
	1 Leakage current limits .....	16
	2 Insulation resistance limits .....	16
	3 Maximum tripping times .....	17
	4 Indicative testing and inspection intervals for electrical equipment .....	20
	C1 Conductor colours for flexible cords .....	26
	C2 Colour schemes of conductor insulation in modern sheathed flexible cords .....	27
	H1 Tripping time accuracy .....	40
<b>FIGURES</b>		
	C1 Cord set .....	25
	C2 Cord extension set .....	26
Amd 1 Apr '11	D1 Measurement of the earth continuity resistance between accessible earthed metal parts and the earth pin of the mains plug .....	29
	D2 Measurement of the earth continuity resistance between the mains plug earth pin and the earthing aperture contacts of an EPOD .....	29
	E1 Leakage current test setup using differential test method for Class II three-phase equipment .....	32

Amd 1  
Apr '11

E2	Leakage current test setup using differential test method for Class II single-phase equipment .....	32
E3	Measurement of the insulation resistance between live supply conductors and accessible earthed metal parts of typical Class I equipment .....	33
E4	Measurement of the insulation resistance between live supply conductors and accessible metal parts of a typical Class II equipment .....	33
E5	Measurement of the insulation resistance of an EPOD .....	34
F1	Measurement of the insulation resistance between live supply conductors to a portable isolating transformer and accessible earthed parts for Class I isolating transformers or accessible metal parts for Class II isolating transformers .....	36
F2	Measurement of the insulation resistance between live supply conductors and the portable isolating transformer output (secondary) winding .....	36
F3	Measurement of the insulation resistance between a portable isolating transformer (secondary) winding and accessible earthed parts for Class I isolating transformers .....	37
G1	Measurement of the insulation resistance of a power supply .....	39
