Restraint of children with disabilities, or medical conditions, in motor vehicles

Superseding AS/NZS 4370:1996
This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee CS-085, Child Restraints for Use in Motor Vehicles. It was approved on behalf of the Council of Standards Australia on 19 April 2013 and on behalf of the Council of Standards New Zealand on 29 April 2013.

This Standard was published on 14 May 2013.

The following are represented on Committee CS-085:
- Association of Accredited Certification Bodies
- Australian Automobile Association
- Australian Automotive Aftermarket Association
- Australian Chamber of Commerce and Industry
- Australian Competition and Consumer Commission
- Australian Industry Group
- Austroads
- Centre for Automotive Safety Research
- Civil Aviation Safety Authority
- Consumers Federation of Australia
- Department of Infrastructure and Transport
- Engineers Australia
- Export New Zealand
- Federal Chamber of Automotive Industries
- Federation of Automotive Products Manufacturers
- Kidsafe
- New Zealand Retailers Association
- New Zealand Transport Agency
- NSW Ministry of Health
- NSW Office of Fair Trading
- Roads and Maritime Services
- Royal New Zealand Plunket Society
- Safekids New Zealand
- VicRoads

Keeping Standards up to date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards webshop at www.standards.com.au or Standards New Zealand’s website at www.standards.co.nz.

Alternatively, Standards Australia publishes an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organisation.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the title page.

This Standard was issued in draft form for comment as DR AS/NZS 4370.

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee CS-085 Child Restraints for Use in Motor Vehicles, to supersede AS/NZS 4370:1996.

The objective of this Standard is to enable a prescriber to assess the need, identify the available options and recommend the most suitable option for restraining a child, with one or more disabilities, or a medical condition, while travelling in a motor vehicle.

Changes in this edition include a new comprehensive assessment guide, including considerations for children with complex and challenging behaviours. Appendix A has been updated to reflect recent research and a new appendix is included providing a sample prescribing pro forma to assist the prescriber in complying with this Standard.

The term ‘informative’ has been used in this Standard to define the application of the appendix to which it applies. An ‘informative’ appendix is only for information and guidance.

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE
This Standard sets out options for restraining a child with one or more disabilities, or a medical condition, while travelling in a motor vehicle, to minimize the risk of bodily injury in an impact.

1.2 APPLICATION
To enable a child to travel in a motor vehicle and to reduce the risk of bodily injury to both the child and other occupants in a vehicle impact, the guidelines in this Standard give restraint options in order of preference. They range from the most desirable (a compliant child restraint) to the less preferable (a customized restraint or other option).

The Standard covers children up to the age of 16 years. However, the Standard may be applicable for persons over 16 years of age. This Standard does not include design, construction and performance requirements for devices to restrain children in motor vehicles, or for wheelchair restraint assemblies.

In using this Standard, the prescriber and the parent(s) will need to be aware of applicable legislation regarding the use of a modified child restraint, special purpose child restraint, customized restraint or other option (e.g. need to obtain medical certificate for an exemption from the relevant road rules).

1.3 REFERENCED AND RELATED DOCUMENTS
1.3.1 Referenced Standards
The following documents are referred to in this Standard:

AS/NZS
1754 Child restraint systems for use in motor vehicles
4535 Ambulance restraint systems
8005 Accessories for child restraints for use in motor vehicles

1.3.2 Related Standards and documents
Additional information may be found in the following documents:

AS
1753 Webbing for restraining devices for occupants of motor vehicles

AS/NZS
2596 Seatbelt assemblies for motor vehicles (ECE Regulation No.16, MOD)
3629 Methods of testing child restraints
3629.1 Method 1: Dynamic testing
3629.3 Method 3: Dynamic testing of upper anchorage components
AS/NZS 4370:2013 Restraint of children with disabilities, or medical conditions, in motor vehicles
