AS/NZS 4417.1:2012
Appending New Zealand-only Amendment A

Australian/New Zealand Standard

Regulatory compliance mark for electrical and electronic equipment

Part 1: Use of the mark
Superseding AS/NZS 4417.1:2009
This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee QR-012, Conformance Marking to Regulatory Requirements. It was approved on behalf of the Council of Standards Australia on 19 April 2012 and on behalf of the Council of Standards New Zealand on 26 April 2012.

This Standard was published on 29 June 2012.

The following are represented on Committee QR-012:

- Australian Chamber of Commerce and Industry
- Australian Communications and Media Authority
- Australian Industry Group
- Australian Information Industry Association
- Business New Zealand
- Consumer Electronics Association of New Zealand
- Consumer Electronics Suppliers Association
- Consumers’ Federation of Australia
- Electrical Regulatory Authorities Council
- Engineers Australia
- Joint Accreditation System of Australia and New Zealand
- Lighting Council Australia
- Ministry of Economic Development (New Zealand)
- National Association of Testing Authorities Australia
- New South Wales Fair Trading
- New Zealand Electric Fence Energiser Manufacturers Standards WG
- New Zealand Manufacturers and Exporters Association

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards webshop at www.standards.com.au or Standards New Zealand’s website at www.standards.co.nz.

Alternatively, Standards Australia publishes an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organisation.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the title page.

This Standard was issued in draft form for comment as DR 11908.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee QR-012, Conformance Marking to Regulatory Requirements.

This standard supersedes the 2009 edition of AS/NZS 4417.1 on 1 March 2013. All new applications for registration to use the RCM from 1 March 2013 are to be in accordance with this standard and are to be made to the EESS database. Suppliers currently registered with Standards Australia will have until 31 August 2013 to register with the EESS database.

The objective of this Standard is to provide a uniform Australian/New Zealand regulatory compliance mark for electrical and electronic equipment. It is intended that such marking will aid regulators in regulatory enforcement and may aid purchasing decisions by consumers.

The revision of AS/NZS 4417, Regulatory compliance mark for electrical and electronic equipment, is to be published as follows:

Part 1: Use of the mark

Part 2: Specific requirements for particular regulatory applications

Existing Parts 3 and 4 will be withdrawn on 1 March 2013.

The standard currently covers requirements for the use of the RCM for electrical safety. It also contains information on the use of the RCM for electromagnetic compatibility and radiocommunications and, in Australia, telecommunications and electromagnetic energy. Other regulatory areas may be included in the future, such as:

a) gas equipment regulatory applications in New Zealand
b) water equipment regulatory applications;

c) energy efficiency/minimum energy performance regulatory applications;

d) medical electrical equipment regulatory applications in New Zealand

This revision includes changes that are compatible with the introduction of the Electrical Regulatory Authorities Council of Australia and New Zealand’s Electrical Equipment Safety System (EESS). It also aligns this standard to the current regulatory requirements of the Australian Communications and Media Authority (ACMA) for electromagnetic compatibility, electromagnetic energy, telecommunications and radiocommunications and the New Zealand Radio Spectrum Management (RSM) regulatory requirements for electromagnetic compatibility and radiocommunications.

Information on the ACMA technical and labelling requirements for electromagnetic compatibility, electromagnetic emissions, telecommunications and radiocommunications is available at www.acma.gov.au.

Information on RSM technical and labelling requirements for electromagnetic compatibility and radiocommunications is available at www.rsm.govt.nz/cms/.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the appendix to which they apply. A ‘normative’ appendix is an integral part of a Standard, whereas an ‘informative’ appendix is only for information and guidance.

Words in bold in the text are defined in clause 2.
1 SCOPE

This standard specifies the requirements for the Regulatory Compliance Mark (RCM) and its placement on electrical and electronic equipment to indicate compliance with regulations applicable to aspects of the equipment as covered in Part 2 of this Standard.

It is to be read in conjunction with ACMA Labelling Notices, RSM Compliance Notices and electrical safety legislation applicable to electrical and electronic equipment in Australia and New Zealand including Acts and Regulation as well as Equipment Safety Rules made under that legislation. Standard AS/NZS 4417.1 is also to be read in conjunction with AS/NZS 4417.2 and vice versa.

In the event of any inconsistency between these documents an Act will prevail over Regulations, which in turn prevail over Equipment Safety Rules. All of these will prevail over AS/NZS 4417.1 and AS/NZS 4417.2 in this event.

NOTE The RCM is a trademark owned by Australian and New Zealand regulators and its design and use are legally protected by registration in Australia and New Zealand.

2 DEFINITIONS

For the purpose of this Standard, the following definitions apply

2.1 regulator
Australian or New Zealand government department or agency responsible for the administration of equipment legislation and regulations

2.2 responsible supplier
(a) for Australia, a person who manufactures the electrical and electronic equipment in, or imports the electrical and electronic equipment into, Australia;

(b) for New Zealand, a person who manufactures the electrical and electronic equipment in, or imports the electrical and electronic equipment into, New Zealand

NOTE Where an Australian responsible supplier of electrical and electronic equipment is registered to supply RCM marked EESS in-scope equipment in Australia, this responsible supplier's registration also deemed to comply to any RCM marked EESS in-scope equipment of the Electrical Equipment Safety System supplied to the NZ market through that Australian responsible supplier.

2.3 electrical and electronic equipment
any apparatus, appliance, cable, conductor, fitting, insulator, material, meter or wire —

(a) used for controlling, generating, supplying, transforming or transmitting electricity; or

(b) operated by electricity
